

Art 101 Lab 2: HTML & CSS Starter

Summary of Efforts

We started the assignment by creating our own HTML file and adding the “Hello World” title. While creating the HTML for the file, we switched off who was coding and who was giving directions several times. To begin, we added a gif of a cat dancing as a placeholder image for our page (both adorable and functional!). We had some errors attempting to add images straight from our computers’ files onto the website, so we instead uploaded our chosen images separately to an image sharing site, from which we could use links to display it on our own. Our greatest challenge was our inability to link the CSS file to our HTML file, on which we were having trouble. We had to ask our TA for help, and it turned out we just had a syntax error in the file link! Afterwards, we were able to stylize our website by changing elements such as border size, text color, text size, and background color in CSS. When we were trying to center our images we realized we didn’t know how to do so, but we were luckily able to find some guidance on W3schools.com, through modifying the display and margin tags. Our first attempts at creating a color scheme were absolutely atrocious, the clashing colors creating an array that was difficult to look at. After much trial and error, we were able to create a somewhat pleasing pastel-cased color scheme, adding an easygoing and fairy-like feel to the entire page. After much effort, we completed our attempts at making an appealing website page, learning valuable lessons in both website programming and visual design.

Hello! I am Chase Croy-Perrett, a UCSC computer science student, and I am excited to be here and learn! I have long been interested in learning digital art and game design, I used to make projects on Scratch (a rudimentary game-making website) for hours! And although I may be a little out of practice at the moment, (due to school and other commitments...) I also enjoy drawing digitally with my tablet, although mostly comics & funny bits about games I like. I'm making a lot of big changes, and I'm looking forwards to be able to show the world once I am done! I'll see you there!

What we have in common!

- Our love of Minecraft and Super Smash Brothers!
- We prefer using character icons rather than pictures of ourselves.
- Enjoyment of noodles.
- Excitement to be in ART101!
